DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a method of processing information wherein a binding profile is evaluated to obtain either a true or false solution, classified in class 703, subclass 11.
- II. Claims 6-12, drawn to a method of processing information wherein the presence or absence of a target sequence is utilized with recovering of a single-stranded presence/absence oligonucleotide which has failed to from a double strand and detecting binding profiles of both presence and absence molecules, classified in class 702, subclass 19. It is noted that claims 7-11 are included in this group due to what appears to be an apparent typographical error in citing claim 4 but containing antecedent basis for presence and absence oligonucleotides in claims 7-11.
- III. Claim 13-19, drawn to a molecular computer with both an electronic and molecular section classified in class 708, subclass 1.
- IV. Claims 20-24, drawn to a molecular computation method and software wherein molecular information is recognizable by an electric program, classified in class 708, subclass 3. The inventions are distinct, each from the other because of the following reasons:

The inventions are distinct, each from the other because:

Art Unit: 1631

The inventions of Groups I - IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions each are directed to specific and different practices as summarized with each Group description above. These different subject matter areas document the undue search burden if they are searched together versus separately.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993)(See 37 CFR § 1.6(d)). The CM1 Fax Center number is either (703)308-4242 or (703)305-3014.
